Summary

Software Developer with 2 years of experience building and shipping 5+ enterprise applications for Indian and US-based clients, delivering scalable, production-ready solutions with end-to-end ownership.

Skills

Programming Languages: C++, C, Dart, Javascript, Typescript
Frontend & Backend: React.js, Next.js, Flutter, Node.js, Express.js, REST API, Unit Testing (Jest), HTML, CSS
Database & Tools: MongoDB, SQL, Firebase, Redis, Docker, AWS, Git, GitHub, Postman, Vercel
Core Concepts: Data Structures & Algorithms, Database Management Systems, SDLC, Operating Systems

Experience

Lauren Information Technology | *Associate Frontend Developer* **Aug'24 - Present**

- Partnered with **US-based client** to deliver critical features for a **large-scale transportation platform**, ensuring timely sprint execution, **performance optimization**, and **accessibility compliance**.
- Led the development of a **role-based financial automation platform** using **Next.js**, **Typescript** and **Shadcn UI**, reducing manual operations by **85%** through workflow automation and structured validation analysis.
- Integrated **cloud service** comparison workflows with field-level validations and **end-to-end testing**, enabling clients to compare provisioning costs across providers instantly.
- Enhanced chatbot **UX** using **React.js** with seamless quick-access buttons and dynamic contextual insight triggers.
- Engineered a **project onboarding and approval tool**, enabling sales and delivery teams to efficiently track and approve new client projects, reducing onboarding time by **40%**.
- Built a mobile application using **Flutter**, integrating Google Maps, offline data sync, and text-to-speech, enhancing response time and accuracy by **30%**.

Projects

Repolens **Oct'25**

Developed a full-stack AI-powered web application using Next.js, Node.js, and MongoDB, designed to help developers analyze and understand repositories efficiently.

- Integrated an AI model to embed repository files and generate context-aware responses, cutting analysis time **80%**.
- Built interactive repository visualization and chat-based interaction for an intuitive developer experience.

InnerBalance **July'24**

Delivered a full-stack mental-wellness mobile app using Flutter, Firebase, and SQL.

- Designed mood-tracking and journaling workflows, increasing user engagement by **35%** during testing.
- Built secure auth, guided assessments, and a chatbot to deliver personalized wellness insights.

SimpliAdmission **April'23**

Created an Android app simplifying the engineering admission process with accurate Mumbai data.

- Integrated cut-off lists, comparisons, scholarships, and FAQs, reducing manual research time by **70%**.
- Delivered a clean, user-friendly interface enabling students to access **30+** college details with high accuracy.

Education

Atharva College Of Engineering, University of Mumbai, India **2020 - 2024**

- *Computer | CGPA: 8.93 /10*

Achievements

- **AWS Certified Solutions Architect – Associate**: Certified in AWS cloud architecture.
- **Coding Profiles**: *TakeUForward* (300+ problems) *Leetcode* (200+ problems)
- Won **Best Project Award** at Projectathon 2.0, a prestigious national-level competition with **100+** participants.
